- (54) Tiue: GENE CODING FOR ANDROCTONINE, VECTOR CONTAINING SAME AND TRANSFORMED DISEASE-RESISTANT PLANTS OBTAINED
- (34) Titre: GENE CODANT POUR L'ANDROCTONINE, VECTEUR LE CONTENANT ET PLANTES TRANSFORMEES OBTENUES RESISTANTES AUX MALADIES

(57) Abstract

The invention concerns a DNA sequence coding for androctonine, a vector containing same for transforming a host organism and the transformation method. More particularly the invention concerns the transformation of plant cells and plants, the drosomycine produced by the transformed plants providing them with resistance to diseases, in particular those of fungal origin.

(57) Abrégé

La présente invention a pour objet une séquence d'ADN codant pour l'androctonine, un vecteur la contenant pour la trasnformation d'un organisme hôte et le procédé de transformation. L'invention concerne plus particulièrement la transformation des cellules végétales et des plantes, la drosomycine produite par les plantes transformées leur conférant une résistance aux maladies, en particulier d'origine fongique.
